Recent graduate, seeking a position of game programmer contributing to the development of video games

EDUCATION

CHAMPLAIN COLLEGE Vermont, Bachelor of Game Programming May 2024

Cumulative GPA: 3.49; Dean's List 2020-2024

WORK EXPERIENCE

Software Co-Op at Teledyne LeCroy. April 2026-July 2026

Objective: Develop test software for an unreleased product.

- Due to product being unreleased I cannot specify what exactly I have done at this time

Software QA Internship at Teledyne LeCroy. October 2024 - March 2025

Objective: Develop test software for a variety of Teledyne Test Tools equipment.

- Worked and Collaborated on an automatic test infrastructure for oscilloscopes.
 - Made python scripts to automatically analyze the matching of screen images to an expected reference.
 - Made a python script to automatically run through all test permutations
 - Developed test Software in Python allowing me to find GUI elements on screen so that a virtual mouse could control the execution of automated tests.

Independent Game Programmer

June 2024 - Present

Objective: Work both solo and with others to create prototypes to help grow my skills as a programmer.

- I worked on and made a custom Event system using the listener and observer pattern which will be used throughout the rest of the game's features and systems.
- Worked on porting scripts from Unity into S&Box as well as learning new features in S&Box's engine.
- Worked on online connectivity, implementing new features that are networked between multiple instances, and debugging issues that arise with networking.
- Worked on a module base system that uses drag & drop scripts that automatically link together to create more complex systems.

RELEVANT PROJECT

Capstone project: RIPTIDE (Released on Steam 2024)

September 2023 – April 2024

Systems & Lead Programmer, 2023-2024, using Unreal Engine 5.

Worked in a team of 8 people which expanded to 17 people after the first semester.

- Programmed a modular objective system that allows for quickly setting up of level objectives without needing to program, rather drag and drop with changes to variables.
- Set up Steam integration and created a simple function to allow the unlocking of achievements to be called anywhere in the game by using one function and the name of the achievement.
- Created a narrative system that plays dialogue throughout a level, intertwined with the objective system, allowing for dialogue to play throughout the level.

ADDITIONAL SKILLS

Technical Skills: Proficient in C++, C#, Unity, Unreal Engine 5, Python

Novice in Godot, HTML, S&Box

Languages: Fluent in English; Conversational Proficiency in Italian, Basic French

Other: Team communication, Agile development, Problem-solving, Collaboration

RELEVANT COURSEWORK:

September 2023 – April 2024

EGD-420 Game Studio III, (Capstone project) GPR-430 Networking for Online Games

GPR-350 Game Physics CSI-281 Data Structures & Algorithms
